

Please leave the telemarketing laws as they are. I am a handicapped individual and sometimes have a hard time getting to the phone and most of the time when it is a telemarketer they have already hung up and that is really inconvenient for me. I also enjoy the peace and quiet when they are not calling me. I received several calls a week and it was really annoying. My sister also is on the list, and she has mobility problems also. She said she sometimes got calls at night after they weren't supposed to call anymore. Please leave the current laws intact. Thank you.
